

The KX-TCA275 Business DECT Handset - Integrated Wireless Mobility Solution!

Panasonic's KX-TCA275 Business DECT is an integrated wireless mobility solution designed specifically for use with Panasonic PBX's. Combining small, compact size, light weight and durability, with a host of powerful business telephony features.

Businesses can increase employee availability and productivity using Wireless XDP (eXtra Device Port), as users can set their KX-TCA275 Business DECT to have the same extension as their desk phone, allowing them to receive and make calls even when they are away from their desk.

Automatic hand-over between installed wireless cells - enhances coverage and gives true communication mobility even within large premises.

Full Access to PBX Enterprise Features

Fully Integrated with enterprise telephony features like Multi-line, Dial by name, etc. Flexible CO Keys let you register PBX features and handset functions for quick, convenient access.

Seamless Connection – Automatic Hand-Over

Maintain high connection quality as you walk around, moving from one cell station area to the next while continuing with important business conversation.

200-Station Phonebook

The built-in telephone directory lets you store up to 200 names and numbers.

Talk on charger

Users can now talk on a call whilst the KX-TCA275 is charging. When this feature is on, the call is automatically switched to speakerphone when it is put into the charger.

Answer with Headset Button Switch

Make answering calls easier with a headset button for unrestricted freedom of hands-free communication. Leaving you free to answer incoming calls keeping your hands free to continue with any task at hand.

Illuminated Keypad

For easier operation in low lighting, the enhanced keypad lights up when a call comes in or when you touch any key.

Colour LCD Screen

The new colour LCD screen allows clearer visibility and easier operation from the phones screen. It also allows the phone to be used even in dark conditions.

Power Save Mode

To reduce power consumption the handset turns off the back light depending on the setting for power saving, hence helping to extend the battery power time.
